 - ECPC Egyptian Collegiate Programming Contest (2021)
 - the Best Trainer at Xcodify Company (2022)
 - Experiance certificate From Neo Soft Hub (2024)

PROJECTS

1. Couvreur Roofing Company Website (France)

A full roofing company website built with a custom frontend and backend, supporting services, blog, gallery, authentication, and multilingual UI.

Technologies: Laravel, React.js, MySQL, Tailwind, REST API

Repository: <https://github.com/khaled312001/Couvreur-website>

Live Site: <https://bmbatiment.com>

2. King Kebab Restaurant Management System (France)

A complete restaurant management system providing menu management, orders, admin dashboard, and user authentication.

Technologies: Laravel, Bootstrap, MySQL

Live Site: <https://kingkebablepouzin.fr/>

3. Green Arrow Academy Website (Saudi Arabia – Makkah)

A full academy website for training programs, featuring course management, certificate generation, social media integration, and admin panel.

Technologies: Laravel, Blade, Tailwind CSS, MySQL, MyFatoorah Payment Gateway

Repository: https://github.com/khaled312001/green_arrow_website

Live Site: <https://greenarrow.itegypt.org/>

4. Wasila Charity – Humanitarian Services Platform (Saudi Arabia)

A complete humanitarian service platform built for a Saudi charitable organization. Includes service listings, order management, real-time payment processing, and an admin dashboard.

Technologies: Laravel, MySQL, Bootstrap 5, Sanctum, Spatie Permissions

Repository: <https://github.com/khaled312001/wasila-website>

Live Site: <https://wasela.itegypt.org>

5. Focus Tracker – AI Attention Monitoring System (Qatar – University Project)

A real-time computer-vision system that detects user focus using OpenCV, Python, and WebSockets, with analytics dashboard and real-time communication.

Technologies: Python, OpenCV, Flask, Node.js WebSocket, Laravel, Tailwind

Repository: <https://github.com/khaled312001/focus-tracker>

6. Salsabeel Makkah Water Delivery Platform (Saudi Arabia – Makkah)

A full delivery platform connecting water suppliers, drivers, and customers with real-time order management, product catalog, reviews, and multi-role access.

Technologies: Laravel, MySQL, Bootstrap, Blade

Repository: https://github.com/khaled312001/Water_Website

Live Site: <https://water.itegypt.org/>

7. Hadih Umrah System – (Saudi Arabia)

A full platform for managing Umrah requests, video documentation, service-provider accounts, admin panel, and messaging system.

Technologies: Laravel, MySQL, Bootstrap, Sanctum

Repository: <https://github.com/khaled312001/Hadih-Agency-Uomra>

Live Site: <https://hadih.itegypt.org>

8. WorldTripAgency – Tourism & Travel Booking Platform (Saudi Arabia)

A modern and fully responsive tourism platform built for a client in Jeddah, Saudi Arabia. The system allows users to explore destinations, view package details, submit bookings, manage invoices, receive notifications, and contact the agency. The admin dashboard includes full control over destinations, packages, bookings, and website content.

Technologies: Nuxt, Vue.js, TypeScript, Supabase, Node.js, Tailwind CSS

Live Site: <https://www.worldtripagency.com/>

Repository: <https://github.com/khaled312001/TravelAgency>

9. Smart Wheelchair IoT System – Graduation Project

An IoT-powered wheelchair using Arduino, Bluetooth, and a Flutter mobile app to control movement via voice commands or button controls, built to support users with mobility challenges.

Technologies: Flutter, Arduino C/C++, HTML/CSS, IoT

Repository: <https://github.com/khaled312001/Smart-Wheelchair-Graduation-Project>
